

SURFACE PROTECTION
at-a-glance

Smart use of surface protection enhances the safety and durability of healthcare interiors.

- Clean, fresh aesthetics
- Superior infection control
- Easy maintenance
- Robust & practical

Wall, Corner & Door Protection

Wall protection can play a significant role in mitigating infection risk, providing healthcare workers, patients and site visitors with a first line of defense against manual transmission while simplifying hygiene protocols.

Protective solutions prevent cracks, chips, dents and scratches while mitigating the risk of damage to equipment such as wheelchairs, beds and carts – all without compromising the integrity of your interior’s design.

Doors and frames are at constant risk of damage and are often overlooked. Our custom door & frame and kickplate protection solutions provide superior levels of impact resistance, whether stainless steel or colour matched.

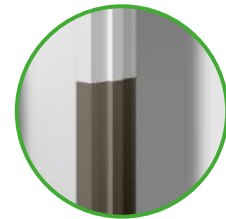

Rigid Sheet

High Impact Corner Guard

Tape-On Corner Guard

Door Frame Guard

Kickplate

Wall Guard

Healthcare professionals often operate within fast-paced environments where the rapid movement of equipment is essential. By investing in durable wall guards, interior spaces and their equipment can be protected from high-impact damage as well as scratches, bumps and abrasions. Wall guards are often combined with handrail for ultimate safety and protection.

Here at Belroc, we know that walls are so much more than surfaces – especially where healthcare is concerned.

Our range of wall panels, corner guards, wall guards, handrail and door frame guard solutions protect your interiors and those who use them.

Handrail

Designed to be easily grasped for ultimate stability & support, our selection of handrails can be used in corridors and stairwells in order to prevent injury by falling. Available with antimicrobial coating, our handrails can act as a strong line of defense against manual transmission.

Bariatric Handrail

3100 Handrail Round

900 Vinyl Round

Beyond reducing the likelihood of accident and injury, handrails act as a primary shield that protects walls and other surfaces. They help healthcare organizations avoid unwanted repair costs, and since handrails are available in a wide range of colours, materials and styles, there's no need to compromise on aesthetics. Special considerations need to be made in Behavioural Health organizations, you can rely on Belroc to help find the appropriate solution.
